Bug Fix Report

RESOLVED
& FIXED

Tester: Rabea Adel Date: August 24, 2026

Bug Identification

Bug ID	BUG-LOGIN-001
Test Case ID	TC-Login-002
Title	Login returns generic error message for invalid password
Module	Backend module 0 / 1 (Auth / Login)
Priority	Medium

Issue Overview & Resolution

Test Scenario	Login with valid email and invalid password.
Previous Behavior (Bug)	Login failed, but the API returned HTTP 400 Bad Request with the message "Invalid email or password."
Resolution Status	**Fixed. The login response behavior has been corrected to return the expected authentication response for a valid email with an incorrect password.**
Fixed Behavior	**The API now returns HTTP 401 Unauthorized with the message "Password invalid" for the invalid-password scenario.**
Verification Result	**Re-testing confirms that the issue has been resolved and the expected response is now returned.**

Verification Note

The invalid-password login scenario was re-tested after the fix. The API now follows the expected behavior: HTTP 401 Unauthorized with the message "Password invalid".

Final Status

RESOLVED & FIXED

The bug is considered fixed and verified based on the successful re-test.
